# **Drill Jig Bushing**

I.D.

Bushings are made in 3 different types for precise drilling, drilling and reaming. Available in increments of 0.1 mm according to size of drill or reamer.

## UNDERCUT

Two-way undercut allows bushings to fit flush on top of jig.

O.D.

Highly precise finish based on I.D.

Blended and polished for smooth entry of cutting tool.

## HARDNESS

H.R.C60°  $\sim$  64° for long wear free.

## MATERIAL

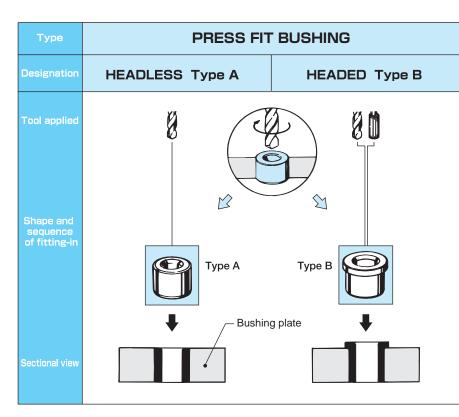

JIS SK-5 or selected steel.

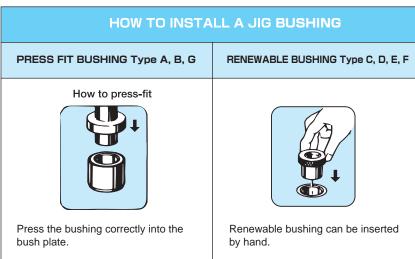

## CHAMFERS

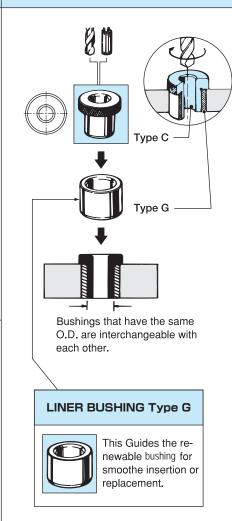

Chamfers on Bushings permit easy insertion.

**RENEWABLE BUSHING**

# Type D Right Slip Renewable Bushing Type D

\* 1.Bushing with I.D. size smaller than 3.0mm uses 30 degreed chamfered radius (R).

T or R

**Example** 

## **Application**

- Right slip renewable bushing can be frequently used in the following cases.
- 1. Same products are made in quantity for long period.
- 2. Hole size differs from one workpiece to another.
- 3. Drilling requires two or more different drills, or reaming is necessary after being drilled.

- 1. Right slip renewable bushing must be used in combination with headless liner bushing (Type G).
- 2.O.D.(D) of right slip renewable bushing must coincide with I.D.(d) of headless liner bushing.
- 3. Bushing is held in place by a lock screw or a round clamp fitted into a milled recess in the head of bushing.
